

SCOBAMAT*

GROUND REINFORCEMENT MATS

THE UNIQUE ADVANTAGES FOR YOUR SAFETY

Scobamat fibre-glass reinforced structured ground mats are used to cover soft or uneven ground during rescue or salvage operation on difficult terrain.

Scobamat design prevents mat rolling and is suitable for large vehicles, such as

- ✓ aircraft (e.g. the new A 380)
- ✓ caterpillar track heavy loaders
- ✓ Fire Appliances
- ✓ Construction machinery/cranes

Fields of application:

- ✓ Airports
- ✓ Fire brigades
- ✓ Military
- ✓ Construction and civil engineering

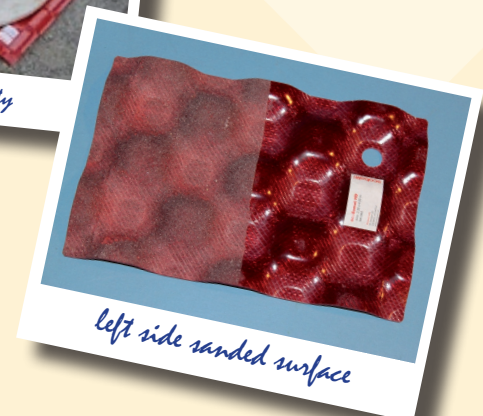

Scobamat is distinguished by:

- ✓ Easy handling – stackable sheets weight about 48 kg each
- ✓ Fast to lay – lightweight, no special tools required
- ✓ stacks flat for easy storage
- ✓ oil and petrol resistant
- ✓ can be easily cleaned by pressure water jet
- ✓ Reliable use – proven worldwide
- ✓ Extremely robust – to support heavy loads on soft terrain

Technical details of Scobamat STANDARD – part-no. 0350011900

designed for heavy wheel/track vehicles and airplanes

- ✓ mat size 4 x 2 m (8 m²)
- ✓ standard thickness: 4 mm
- ✓ load resistance per m²: 220 tons
- ✓ weight of 1 mat: 48 kg (6 kg per m²)
- ✓ 6 pre-drilled fixing holes
- ✓ material: fibre-glass reinforced epoxy-resin (GRP)
- ✓ color: red
- ✓ sanded surface for enhanced grip

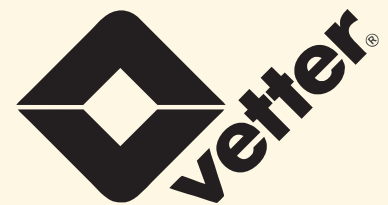

Flexibility

modulus in flexure resp. flex resistance:	130 N/mm / 3200 (N)
compressive strength / resistance to compression:	28 kN/mm / 130 (kN)
withstands pressure:	min. 2.3 N/mm ² / 13 tons/A4 sheet

* Tradename of Scobalit AG CH-8405 Winterthur

Scobamat accessories

Peg, hot zinc dipped 500 mm
0350028000

Hammer, blow-back proof
0350028100

Extraction tool for pegs
0350033400

Application examples

Airplanes are stranded when they stray afield. Scobamat is the fast and reliable way to get them back on the runway.

Airplane beside the runway

This 15-tonne container is made to roll on two small rollers when it is set down. Scobamat "instant paving" makes this possible even on grass.
